

Welcome to Lasting Dreams Daylilies

*Located in Western New York State, we are an **Open Display Garden & NYS Licensed Nursery/Grower**, encompassed within our five acre farm. With three acres dedicated to daylilies, featuring over **1800 AHS Registered Cultivars** plus hundreds of seedlings from our own hybridizing program; we offer the largest daylily collection in the Buffalo-Niagara Region, and one of the largest in NYS. We feature the finest releases from some of the best renowned hybridizers throughout the US and Canada, as well as many lesser known regional hybridizers producing some outstanding cultivars. Our **Garden Artistry Collection** displays the creations of over **255 Hybridizers** spanning **75 years** of work.*

From our start in 2005, opening to the public in 2009, and continuing through to today, we have dedicated ourselves not only to serving the daylily collector, but to provide education and outreach to the gardening community and the general public. When you visit, you will find spacious walkways which parallel long flowing beds of daylilies, in lined out, field grown divisions. Our gently sloping grounds make it easy access and walking for all ages. As one is surrounded by the beauty and colors on display, there are plenty of areas to sit, relax, and simply enjoy the experience of your visit.

We also offer many amenities to help you enjoy your time with us. Our sales area includes a gift shop where you will find a varied selection of goods available, plus we provide ample seating, shaded venues, and restroom facilities. As we continue to develop our grounds, you will find additional mixed beds of annuals and perennials to enjoy. In addition to our Field Grown Selections, a limited supply of daylilies and other perennials are available in pots; plus a selection produce, naturally grown on-site, is available in season. Our goal is to provide a destination that will exceed your expectations, a garden that visitors will want to return to often with friends, drawn to see and learn more about this perfect perennial. Children are especially welcome as we strive to stir in them a passion for gardening.

Although a rural setting, we are adjacent to US Route 219 and very easy to find. We have both on-street and off-street parking, and can accommodate any type of vehicle from bicycle to bus. When visiting, there is a varied selection of eateries, venues, and sightseeing nearby, as well as other gardens, historic villages, and additional activities. If you can't visit, we ship throughout the US and Canada; and everyone receives a bonus daylily for every \$50 in sales.

We are open for sales in May, and the gardens are open from June through September, with July being Peak Bloom Season. Our daily hours vary throughout the season, but are posted on our Website, Facebook, and Phone Message; personal appointments are also available, clubs and groups are welcome with advance notice. We are listed on Google Maps, just search our name, or call us for detailed directions.

We Look Forward To Your Visit,
